DETAILED ACTION

1. Upon review Applicant's amendments to the claims, it is noted that a restriction/election is warranted. Any inconvenience to Applicant is regretted.

Election/Restrictions

1. The applicant is required under 35 U.S.C. 121 to elect one of the following disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, no claims are generic):

- I. Wherein the server is configured to facilitate updating the communication period based on a resale/transfer user information (Claim 2).
- II. Wherein the server is configured to facilitate acquiring the resale/transfer user information indicating a new user of the terminal from a selling agent's system during the communication period (Claim 14).

2. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement (e.g., I or II), and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 3663

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
